

## COLD BODY STORE CABINET

A VITAL STAPLE FOR CREMATORIUMS

The Addfield Cremations refrigerated body storage cabinet is a fully insulated unit, designed to support coffins with stainless steel body trays, designed for even temperature distribution throughout, practicality and hygiene.

The complete storage unit is thoughtfully engineered for safe, single operator use, combining functionality with advanced manual handling support.

Specifically tailored for crematoriums, it not only streamlines workflow but also upholds the highest standards of dignity and respect for the deceased.

### KEY FEATURES

- Available in 3,4 or 5 tier options.
- Premium 304 stainless steel construction that is hygienic and corrosion-resistant.
- Fully adjustable stainless steel racking.
- Frameless, self-supporting modular panels that can be expanded further in the future.
- Multiple tray width options for a versatile body storage solution.
- Fully adjustable temperature control to meet regulatory requirements.
- User friendly monitoring control system.

\* Customise your Refrigerated Body Storage Cabinet with cladding options, stub rollers for trays and coffin storage, single or multiple bay options available, or add 80/100mm thick panels to suit.
